Abdelrahman Abozena
SWE Intern at Microsoft | AI-Driven Software Engineer | Backend Specialist
Giza, Egypt | boodyabozena@gmail.com | LinkedIn | Portfolio | GitHub

PROFESSIONAL SUMMARY

AI-Driven Software Engineer and Computer Science undergraduate with hands-on experience building backend systems, AI agents, LLM workflows, and machine learning pipelines. Focused on Python/FastAPI, Node.js/Express, multi-agent systems, RAG, and real-time data processing.

TECHNICAL SKILLS

AI & ML: LLM Agents, RAG, LangGraph, Machine Learning, Multi-Agent Systems, Ollama
Backend: Python, FastAPI, Node.js, Express, RESTful APIs, WebSockets, Kafka
Databases: MongoDB, MySQL, SQLite
Tools & Languages: JavaScript, TypeScript, C#, React, Git, Flowise, n8n

WORK EXPERIENCE

Instant Software Solutions | AI & Data Science Engineer
Jan 2026 - Present | Giza, Egypt
- Engineering AI-driven solutions and integrating LLM-powered automation into backend systems.

Foursw | Artificial Intelligence Engineer
Jun 2026 - Oct 2026 | Giza, Egypt
- Integrated LLMs, AI agents, and intelligent workflows into software systems.

EgenSolve | Back End Developer
Mar 2025 - Apr 2025 | Giza, Egypt
- Developed an employee-account and system-issue management backend connecting users with developers.

Crossover | React Developer
Oct 2022 - Dec 2023 | Part-time freelance through Crossover

INTERNSHIPS & TRAINING

Microsoft | SWE Intern
Oct 2026 - Present | Cairo, Egypt

FlyRank AI | Backend AI Engineering Intern
May 2026 - Aug 2026 | Giza, Egypt

Orange | Intern
Jul 2026 | Qesm El Doki, Egypt
- Built agent workflows using Flowise and n8n with RAG, vector databases, memory, and external tools.

DEPI (Digital Egypt Pioneers Initiative) | Machine Learning Engineer
Nov 2025 - Jul 2026 | Completed Microsoft Machine Learning Engineer track

KEY PROJECTS

- Hivo Studio: Built a local-first multi-agent coding workspace for planning, coding, validation, and context management using TypeScript, Rust, and Ollama. In progress.

- HarrTest: Developed an agent skill requiring implementation, application execution, observation, and verification evidence before reporting completion. In progress.

- AgenticAI Community Simulator: Built an AI-persona simulation of discussion and opinion evolution with FastAPI, WebSockets, and a React dashboard.

EDUCATION & CERTIFICATIONS

Computer Science - Egyptian Chinese University | Undergraduate
AI Summer School - Harbin Institute of Technology, China | Jul 7-18, 2025
Google x Kaggle - AI Agents Intensive Certification
GCI World - University of Tokyo, Matsuo-Iwasawa Laboratory | Completed Aug 2026
Learning C# - LinkedIn Learning | Oct 29, 2026
AI Level 1 - Orange Digital Center | Sep 2024 | Grade 99%
IMPACT Hackathon - 1st Place with Hivo Studio | GDG on Campus, ECU | 2026
